

WELDING

KB Heating & Air Conditioning Ltd. is a locally owned family business, serving Southern Alberta and the surrounding area since 1983. Our fully licensed and bonded plumbers, gas fitters, sheet metal and refrigeration mechanics, welders and service technicians meet all the needs of Residential, Commercial, and Industrial customers. Our strong and experienced team offers a fully integrated, one stop shop for plumbing, heating, metal fabrication, refrigeration and 24 hour service.

If you have specific design and manufacturing requirements, we can fill your needs. Backed by modern shearing, braking and metal forming equipment, our experience includes galvanized iron, mild steel, pre-painted flashing products, aluminum, copper, brass and plate steel.

KB Heating is proud to add and compliment our many facets of business a dedicated B-Pressure Welding division. We now have the capabilities of not only providing in house metal fabrication and welding but also a fleet of portable welding trucks to meet all of your welding and fabricating needs remotely. KB Heating and Air Conditioning can construct, repair, or alter any of your Power Piping, Process Piping, and Boiler Piping. We can also repair or alter your Boiler or pressure vessels as per our stringent QC (Quality Control) program set out by Alberta Boilers Safety Association.

For all your Process Piping, Boiler Piping, Boiler repairs or any Quality Control regulated project you may have, KB Heating & Air Conditioning can provide the Control and Management Program for you.

Please call to discuss how KB Heating & Air Conditioning can assist you with your welding or custom fabrication needs.

You'll find comfort with us!

- ASME B31.5 Refrigeration Piping

Repair/Alter

- ASME Section I Power Boilers
- ASME Section IV Heating Boilers
- ASME Section VIII Pressure Vessels

- B-Pressure Welding
- Custom Metal Fabrication
- Mild Steel
- Stainless Steel
- Aluminum
- CNC Hi-Definition Plasma
- 250 Ton CNC Press Brake
- Shearing 1/4" x 120" Mild Steel
- Shearing 3/16" x 120" Stainless Steel

We have been using KB Heating as one of our main contractors for over twenty six years. Our dealings with KB Heating have been very good as they are reliable and professional in the work they do for us. We run three shifts year round and when machinery goes down, it can result in large costs not to mention our reliability to our customers. KB continuously reacts to our needs in order to minimize our downtime on critical equipment.

KB Heating has a variety of different professionals on staff to take care of our plumbing, ventilation, HVAC systems, boiler, gas combustion ovens, engineered air makeup units and furnaces. KB Heating has a high level safety program to ensure all their employees are trained and educated on our continuous changing requirements.

We are very pleased with the level of customer service we receive from KB Heating as the service we get after installation is very important to Kawneer.

Sincerely,

Terry Palmer, Engineering Manager
Kawneer Co Canada Ltd.
